NO MORE NEEDLESS INJECTIONS

(Actual size, 100 µl)

One and done

ALZET® Osmotic Pumps are small infusion pumps inserted at the beginning of your study and then, that's it. There's no dosing schedule. No repeated injections. Just a continuous, predictable release of your test agent for the entire study. Days. Nights. Even weekends. Anywhere from one day to six weeks. With no external connections to monitor and less need for handling, it's less stress for you and your lab animals. Learn more about ALZET Osmotic Pumps and just how needless injections can be at **alzet.com/NoMoreNeedles**.
